Private Money.

Easy Money.

Your Money.

Try It Out LIVE BETA

Pampalo's Private Unstoppable Money – powered by `commbank.eth` – is live now.

Encrypt & decrypt up to **\$100 USD / month**. Deposits require a **1 hour** wait (to keep bad actors out). Withdraw anytime, within the monthly limit.

Heads up: Pampalo is experimental and unaudited – exercise caution, and do not deposit any funds you're not comfortable losing.

- *Like Signal, but for money.*
- *Like Infinex and Railgun had a baby.*
- *How most apps will be built moving forward – privacy first.*

Official Roadmap

- 1 Official Audit**
Independent audit of auth model, contracts & ZK circuits.
- 2 peer.xyz (formerly zkP2P) integration**
Go straight from your bank account to private money on-chain – no intermediate steps.
- 3 Private Swaps**
One click and approve encrypted asset swaps, directly inside Pampalo.

...plus a heap more. Follow the project on Twitter/X at @pampalodotcom for updates.
